Professional Summary

Senior Quantitative Analyst and Physicist with 7+ years of experience transforming complex data into strategic financial assets. Specialist in **end-to-end development of analytical tools** (R/Shiny) and advanced modeling (Capital, Risk, Profitability). Entrepreneurial mindset focused on process automation and scalable modeling.

Experience

2025–Present **Risk & Analytics Specialist**, *Santander Analytics*, Madrid / Remote

Leading technical methodology and capital optimization at a global scale.

- **Capital Modeling:** Architect and maintain core models for Asset Correlation, Capital Consumption, and DTAs, optimizing the bank's capital structure.
- **Profitability Engineering:** Defined and automated the calculation of **RORAC** and **RORWA** metrics, directly impacting strategic decision-making.
- **Pension Risk Leadership:** Lead methodological modeling for Pension Risk, ensuring compliance and mathematical rigor under international standards.
- **Consultancy & Support:** Act as an internal consultant providing model replicas, independent validation, and methodological support for complex financial operations.

2018–2025 **Quantitative Risk Analyst**, *Santander Analytics*, Madrid

Developed data-driven solutions for risk management and financial visualization.

- **Product Development:** Built and deployed advanced **R/Shiny applications** to visualize and manage complex exposures, reducing reporting time and increasing data transparency.
- **Regulatory Modeling:** Designed risk models (Counterparty & Capital) aligned with CRR/Basel III, bridging the gap between technical math and business requirements.
- **Advanced Analytics:** Specialized in financial projections and extrapolations using physics-based statistical approaches to forecast portfolio behavior.

2018 **Quantitative Trainee**, *Santander Analytics*, Madrid

- Improved feature engineering for mathematical models and automated technical documentation processes.

Technical Stack & Expertise

Programming **R & SHINY (Expert)**, SQL (Advanced), Excel/VBA (Expert), LaTeX, Git, Python & C++ (Intermediate).

Quantitative Financial Modeling, **Capital Theory**, Pension Risk, Bayesian Statistics, Asset Correlation, RWA Optimization.

Business Wholesale Banking, Profitability Analysis (RORAC), Corporate Valuation, Collateral Management.

Languages Spanish (Native), **English (C1 Advanced - BEC Higher)**.

Education

2017–2018 **MSc. Finance and Banking**, *Garrigues Study Center*, Madrid

Specialized in Markets and European Regulations.

2016–2017 **MSc. Biostatistics**, *Complutense University of Madrid*, Madrid

Focus on Probability, Mixed Models, and Simulation.

2010–2016 **BSc. Physics**, *Complutense University of Madrid*, Madrid

Specialization in Meteorology and Complex Systems.
